PROFESSIONAL SUMMARY

Full-stack Web Developer with a self-taught background in XML Languages. Diligent and determined individual with experience in the Music Industry.

TECHNICAL SKILLS

HTML, CSS, JavaScript, jQuery, AJAX, GIT, APIs, Bootstrap, JSON, XML, XSLT, XSL-FO, and DITA.

PROJECTS Weather-Dashboard | [GitHub](#)

- Weather application using the Open Weather Map API. User enters a city, and the page populates with the today's weather and a 5-day forecast.
- Responsibilities: Wrote code for the front and back end.
- Tools/Languages used: HTML, CSS, jQuery, JavaScript, Bootstrap, AJAX, APIs, Local Storage.

Code-Quiz | [GitHub](#)

- Created a timed multiple-choice quiz. This project focuses on utilizing local storage and state management. Using JavaScript, I dynamically changed the HTML based on the user's interaction.
- Responsibilities: Wrote code for the front and back end.
- Tools/Languages used: HTML, CSS, JavaScript, Bootstrap, Local Storage.

Work-Day-Scheduler | [GitHub](#)

- This project focuses on dynamically updating a work calendar with jQuery. Events are saved even after exiting the application. Each time block is compared against the current time and color-coded depending on if the event is in the past, present, or future.
- Responsibilities: Wrote code for the front and back end.
- Tools/Languages used: HTML, CSS, jQuery, Bootstrap, Moment.js.
